

REMARKS

Claims 1-26 are pending in the application and stand rejected under 35 U.S.C. 101. Although Applicant respectfully disagrees with the legal and factual basis of the rejections, the claims have been amended in the interests of cooperation for the sole purpose of expediting prosecution and placing the application in condition for allowance. For instance, claim 1 has been amended to recite, in short, a system comprising a *client computing device* and a *server computing device*, both having means for performing respective functions as recited in claim 1. In this regard, claim 1 is unquestionably directed to statutory subject matter.

Moreover, claims 6, 16, and 26 have also been amended to recite *client computing device* and *server computing device*, and claim 25 has been canceled without prejudice. Accordingly, claims 1-24 and 26 are believed to satisfy the requirements of 35 U.S.C. as understood by the Examiner. Accordingly, Withdrawal of the 101 rejections is requested.

New claim 27 has been included to further define the invention, but does not introduce new matter or otherwise raise new issues that would require a further search and consideration. Claim 27 is directed to another embodiment of the invention directed to a *method for making a computer implemented process to enable conversational navigation*, which recites claim limitations essentially the same as allowable claim 1, but written in the context of instantiating computer instructions to perform the functionalities recited in claim 1. In this regard, new claim 27 is believed to be allowable over the cited art of record for at least the same reasons acknowledged by the Examiner with regard to claim 1, and to further satisfy the requirements of 35 USC. 101.

Respectfully submitted,

Frank DeRosa
